

CHANTELLE CONLON SCOULLAR

+61413122769 | <https://github.com/chanteCon> | <https://www.chantellecs.com>

Computer Science masters student with experience building systems using Node.js, TypeScript and Express, with a focus on APIs, authentication, security and automated testing.

Skills

Languages: TypeScript, JavaScript, Python, Java, C

Frameworks & Libraries: Node.js, Express, React, Next.js, Jest

Databases: PostgreSQL, MongoDB

Tools & Methodologies: Git & GitHub, Docker, CI/CD, REST API design, TDD, OOP, Agile

APIs & Security: REST API design, JWT, Authentication & Authorisation, MFA

Projects

Authentication API - <https://github.com/chanteCon/authAPI>

Node.js, TypeScript, Express, PostgreSQL, Prisma, Redis, Jest, Docker

- Designed and implemented JWT authentication using short-lived access tokens and database-backed refresh tokens.
- Implemented email verification, password reset and email-based MFA using time-limited codes stored in Redis.

Video Playlist Manager — LIVE <https://playlist.chantellecs.com/>

Node.js, TypeScript, Express, PostgreSQL, Prisma, Redis, Jest, Docker

- Developing a REST API for organising videos from external platforms such as YouTube and TikTok into playlists, using the Authentication API for user authentication and authorisation.
- Implemented URL parsing, platform identification, metadata retrieval and Redis caching with stale-data refresh.
- Designed relational data models and built unit and integration tests using Jest and Testcontainers.

Education

Master of Information Technology in Cybersecurity - Present

Queensland University of Technology | 2026-present

Graduate Certificate in Cybersecurity - High Distinction

University of Wollongong | 2024-2025

Bachelor of Computer Science - Distinction

University of New South Wales | 2020 - 2023

Employment

Customer Service Representative | Pathology & Imaging at Healius

July 2023 - May 2025 (1 year 11 months)

Key responsibilities:

- Supported pathology and medical visa workflows, liaising with clinics, laboratories and internal teams to resolve operational issues.
- Developed an Excel order-tracking system and automated billing data-cleaning processes, improving order recovery and reducing manual workload.
- Managed sensitive data with a strong focus on accuracy, confidentiality and timely processing.
